

Torrent de Pareis

Perhaps the greatest natural spectacle, Mallorca has to offer!

For the ones who really are fit and craving for a very special hike, don't miss the opportunity to explore this fascinating canyon. High cliffs with an altitude of 300m, the canyon is ending at the sea.

The view from Escorca already offers an impressive view of the course of the Torrente de Pareis and the sea behind the amazing mountains - the destination of your hike. The way begins easy, going down between Aleppo pines and oaks, until one reaches the slope down to the torrent ... The scenery in the gorge is constantly impressive and fascinating because of the many faces of the torrent...Huge boulders, in beautiful, artistic way sanded and smoothly polished; up to 300m high cliffs, at some passages you just find a small slit of blue sky, pristine nature, complete silence...

Constantly impressed, at the end you can taste the salty air of the sea before after several hours of silence and solitude with the nature the gravel beach of Sa Calobra appears.

A must for adventure seekers and people who are looking for something special!

Price 35 €/Person, optional return by boat + 15€
